 - iii. Set up of self-service request or out-of-the-box request approval process
 - iv. Total of 3 Profile Rules with up to 2 conditions and 5 actions each
 - v. Profile rules can apply to single fields or multiple fields

Conga Contracts Basic Contract Templates Accelerator Add-On

For each additional Template, Conga PS will configure the following scope:

Basic Template Creation

1. Contract Template deliverables include:
 - a. Contract Template creation:
 - i. Up to 8 pages per template
 - ii. Up to 15 merge fields per template
 - iii. Clauses and questions are out of scope for the basic template

Conga Contracts Complex Contract Templates Accelerator Add-On

For each additional Template, Conga PS will configure the following scope:

Complex Template Creation

1. Contract Template deliverables include:
 - a. Contract Template creation:
 - i. Up to 30 pages
 - ii. Up to 30 merge fields per template
 - iii. Up to 15 clauses per template
 - iv. Up to 5 questions per template
 - b. Configuration of the Clause Library
 - i. Up to 15 Clauses
 - ii. Up to 5 Clause Types
 - iii. Up to 5 Clause Categories

Conga Contracts, Contract Flow Accelerator Add-On

1. Standard Business Process Flow(Contract Flow);
 - a. Flow as predefined by Conga that will include up to;
 - i. 7 Process Stages – supporting contract drafting, internal reviews, negotiation, internal approvals and contract executions (e-sign or wet sign);
 - ii. 16 Action Steps per Stage – supporting: task completion, approvals and automatic notifications;

Conga Contracts eSignature Accelerator Add-On

 - a. Conga Sign, DocuSign or Adobe Sign
 - b. Add signature tags to all Conga Contract templates listed as in scope
 - i. Up to 2 signers per template

Conga Contracts SSO Accelerator Add-On

1. Conga will provide up to 4-hours of support to the customer to advise on the setup of SSO

Conga Contracts Data Migration Accelerator Add-On

1. Data Migration
 - a. Conga services will perform a basic data import from the Conga Contracts MS Excel Data Template into: Company Profile, Contract Profile, Contract Documents, and People.

- Up to 10,000 records / documents and 10 custom fields per data record (ex. Company Profile, Contract Profile). Up to 3 test iterations to Stage and 1 to Production.
- i. Creation of new Company and Contract records with related metadata
 - ii. Automatically pull files from a single shared drive and attach associated files to the related records
 1. When OCR is enabled in the system, Conga will OCR all the documents upon upload to make them searchable within Conga Contracts
 - iii. Conga will provide training on data cleansing activities and error resolution
- b. Data Migration Assumptions
- i. The Customer will provide 1 consolidated CSV or Excel workbook. Conga will provide a template to assist with the data preparation.
 - iii. The Customer is required to perform the data collection prior to the data import. This includes data extraction from the current system(s).
 - iv. The Customer is required to perform the data cleansing prior to the data import. This includes de-duplication, OCR, and other enrichment activities. Additional data cleansing activities:
 1. Parsing name fields. You have "Dr. Owen McClung, Director" stored in your database. You want to create a person from this field. In order to create a person, we have to parse and clean this data to put "Dr" in the Salutation field, "Owen" in the First name field, "McClung" in the Last Name field and "Director" into a title field.
 2. You are translating values from an old value to a new value. For example, you have the letter "A" in your legacy data and you want this to appear as "Active" in the new system.
 3. You are retiring values, users, etc. For example, you have Contract Managers assigned to Contracts that you don't want to setup as users in the system.
2. Metadata error resolution is the responsibility of the client. Conga assumes that The Customer will update the spreadsheet to resolve any errors identified after each iteration performed by Conga.
